

**Twenty-sixth DOE Conference (1980) – Available from DTIC, Accession Database Number
ADA101442, \$44.60**

Cover

Title

Foreword

Table of Contents

Program

How Far to Go in Looking at Data, F.J. Anscombe

The Use of Ridge Regression in Trajectory Estimation, William S. Agee and Robert H. Turner

An Eight Variable Composite Design for Fitting a Second Order Response Surface, Carl B. Bates

An Application of Order Statistics to Time-Sequence Logic, William E. Baker and Malcolm S. Taylor

Radar Error Signal Improvement, Robert E. Green

Use of the Bilinear Z-transform in Implementing Digital Filters, Donald W. Rankin

Inference Procedures for Determining Life Time Estimates of Advanced Materials, Donald Neal,
Edward M. Lenoe, and Donald Mason

Risks to Neighboring Facilities, Paul C. Cox

The 1980 Samuel S. Wilks Memorial Medal, Frank E. Grubbs

Optimal Estimation Techniques for Forecasting Propagation Parameters, K.E. Kunkel and D.L.
Walters

Some Results for the Univariate Normal Random Linear Regression Model Prediction Theory, D.G.
Kabe

Adaptive Median Smoothing, William S. Agee and Jose E. Gomez

Fitting an Ellipse, Donald L. Buttz

Methods for Approximating Mathematical Functions, Donald W. Rankin

MOS Training Course Selection Criteria: An Application of Discriminant Analysis, Pat Cassady and
Lounell Snodgrass

The Armor Combat for Model Support (ARCOMS) Field Experiment, Roger F. Willis

Extreme Value Quantile Response Experimental Design, Jill H. Smith and Jerry Thomas

Alternative Quantile Estimation, W.D. Kaigh

The Rank Transformation as a Robust and Powerful Tool for the Analysis of Experimental Data, W.J.
Conover

The Nonparametric Estimation of Probability Densities in Ballistics Research, Chih-chy Fwu, Richard
A. Tapia, and James R. Thompson

Testability of Linear Hypotheses in Normal Linear Models, Gerald S. Rogers

The Potential Utility of Crossing a Fractional Factorial with a Full Factorial in the Design of Field Tests, Carl. T. Russell

Some Remarks on Crossover Experiments, J. Robert Burge

A Time Series Analysis and Modeling Approach of Sense and Destroy Armor (SADARM) Radiometric (Electromagnetic Radiation) Noise Data, Richard T. Maruyama

The Role of Spatial Bandwidth Limits in the Measurement and Interpretation of Second-Order Statistical Properties, E.L. Church

Bounds for Optimal Confidence Limits for Series Systems, Bernard Harris and Andrew P. Soms

Optimal Upper Confidence Limits for Products of Poisson Parameters with Applications to the Interval Estimation of the Failure Probability for Parallel Systems, Bernard Harris and Andrew P. Soms

Reliability Based Safety Factors for Concrete Structures Sliding Stability, Paul F. Mlakar

A Unified and Unbiased Analysis for Decision Making in Paternity Disputes, Paul H. Thrasher

An Algorithm for Trilateration, James T. Hall

Social Scientist Technique: The Catalyst for Obtaining Objectivity from Subjectivity, Ronald L. Johnson

Some Aspects of Engineering Time Series Analysis, Victor Solo

Stress-Strength Models for Reliability: Overview and Recent Advances, G.K. Bhattacharyya and Richard A. Johnson

On the Interpolation of Gravity Anomalies and Deflections of the Vertical in Mountainous Terrain, H. Baussus von Luetzow

A Sequential k-Group Random Allocation Method with Applications to Simulation, Andrew P. Soms

Registered Attendees
