

**Thirty-ninth DOE Conference (1993) – Available from DTIC, Accession Database Number
ADA281606, \$14.60**

Cover

Title

Foreword

Table of Contents

Agenda

Beyond Classical Statistical Methods: Why and How, Emanuel Parzen

Properties of Simulation Based Estimators of Stochastic Processes, Katherine Ensor

A New Series of Supersaturated Designs, Margaret Gelder Ehm, Marc N. Elliott, and Monnie McGee

An Empirical Study of the Distribution and Properties of the Slope Estimator Using Minimum Normed Distance Criterion, Barbara A. Wainwright

Determination of Desired Design and Operational Characteristics of the Small Area Camouflage Cover by Ground Troops, George Anitole, Ronald L. Johnson, and Christopher J. Neubert

Tree-structured Statistical Methods, Wei-Yin Loh

Combining Simulation Results Addressing Armor Vehicle Survivability, Paul J. Deason

A Rediscovery of the Hodges-Lehmann Estimate, Paul H. Thrasher

Automatic Classification of Research Projects Based on Lexical Content, Mel Brown

An Application of Classification with Potential Use in Reproductive Toxicology, Barry A. Bodt and Ronald J. Young

Confidence Intervals and Tests of Hypotheses for Normal Coefficients of Variation, Mark G. Vangel

Improved Periodogram-based Estimators of Frequency for the Cosinor Model, R. John Weaver, Marshall M. Brunden, and Jonathan Raz

Meta-analysis of Gas Flow Resistance Measurements Through Packed Beds, Malcolm S. Taylor and Csaba K. Zoltani

Desktop Models for Weapons Analysis, John D'Errico and Eugene F. Dutoit

An Application of Generalized p -Values in Tank Gun Accuracy Research, David W. Webb

Identifying the Critical Factors in an Adaptive Network, Ann E.M. Brodeen, Barbara D. Broome, George W. Hartwig, Jr., and Maria C. Lopez

Measures of Effectiveness for Monte Carlo Sensitivity Analyses, Andrew W. Harrell

Attendance List
