

**Thirteenth DOE Conference (1967) – Available from DTIC, Accession Database Number
AD848930, \$44.60**

Cover

Title

Foreword

Welcome Remarks

Table of Contents

Program

Regression Analysis, Francis J. Anscombe

Some Comments on Matching, K.A. Brownlee

On Methods of Optimization of a Multiobjective Survey, John C. Atkinson

Components of Variance of a Linear Function in Repeated Trials, Walter D. Foster

The Derivation of the Operating Characteristic Curve of a Skip Lot Sampling Plan, Allen C. Endres

*A Model for the Formulation of Quality Incentive Clauses for Items Procured According to Acceptance
Criteria Involving Single Sampling Plans by Attributes*, Roger R. Rymer and Eugene Dutoit

Optimum Sampling Plans for Grading Binomial Populations, Paul B. Nickens

The ABBA Sequence: A Sequential Procedure for Comparison Testing, Arthur Pillersdorf

On Expected Probabilities of Misclassification in Discriminant Analysis, P.A. Lachenbruch

Intra-Profile Variance, Claude F. Bridges

*A Statistical Test of Two Hypothetical Reliability Growth Curves of a Logistic Form in the Discrete
Case*, William P. Henke

On the Fitting of the Weibull Distribution with Non-Zero Location Parameters and Some Applications,
Oskar M. Essenwanger

Cochran Awarded the 1967 Wilks Memorial Medal

Determination of the TBO Weibull Probability Parameters for Repairable Components, John L. Mundy

A Technique for Interpreting High Order Interactions, Melvin O. Braaten and John Tonzetich

A Simplified Method for Finding Optimum Experimental Designs, Melvin O. Braaten, Ray L. Miller,
and Fred W. Judge

Definitive Calibration of an Aerial Camera in Its Operating Environment, Lawrence A. Gambino

Design and Analysis of a Statistical Experiment on High Voltage Breakdown in Vacuum, M.M. Chrepta,
G.W. Taylor, and M.H. Zinn

A Moderately Distribution Free Technique for Small Sample Reliability Estimation, Michael G. Billings

Development of an Improved Model for Acoustic Sound Ranging, Robert P. Lee

On Experiments Concerned with the Sampling Distribution of Lanchester's Parameters, David R.
Howes

Estimates of $P(Y < X)$ and Their Application to Reliability Problems for Both Continuous and Quantal Response Data, J.D. Church and Bernard Harris

Numbers Needed for Detecting Important Differences in Chi-Square Tests, F.M. Wadley and C.J. Maloney

On a Statistically Consistent Estimate of an Average Cumulative Quantal Response Function, George W. Evans, II, and Robert C. McCarty

Designs of Experiments as Telescoping Sequences of Blocks, Arthur G. Holms

On a Class of Nonparametric Tests for Interactions in Factorial Experiments, P.K. Sen

On the Rank Mod p of the Design Matrix of a Difference Set, Jessie MacWilliams and Henry B. Mann

Some Statistical Methods in Machine Intelligence Research, I.J. Good

List of Attendees
